This guide will help you understand what cover letters are, when to use them, and how to write your own.
Crafting an Effective Cover Letter

With many employment positions, you may be asked to submit a cover letter or letter of interest. A cover letter is an introduction to your resume and details your qualifications for a particular position or role. Cover letters are written specifically to each individual job posting, using the key skills the job posting is looking for. We recommend submitting one even if it is optional.

When properly written, the letter can help the reader navigate and highlight important items on your resume. This is your opportunity to clearly convey in words how your personal experiences connect to a specific position. This is your time to shine! This section will explain the purpose of a cover letter, best suggestions for content and formatting, and a sample document to display all components together.

Tips & Highlights

There is no singular cover letter for every single position.

Cover letters are typically one page or less (unless otherwise specified by the employer).

Your cover letter should not mirror resume content; Cover letters are meant to add depth to their understanding of why you qualify or are a good fit for the position.

Clearly connect your experiences to the skills required for the position.
Defined:
A one-page (or less) letter to:
• Market your skills, abilities, and experiences
• Accompany your resume and provide more detail
• Relate to the job to which you are applying

The Purpose:
1. Introduce you to an employer
2. Give context for how you found the job
3. Highlight a few of your skills and experiences that make you a competitive candidate

NOTES:
A cover letter is a highlight reel - it should be brief, but informative.

When do I use it?
• Job posting requirement
• Networking/Conveying interest

When do I NOT use it?
• Career Fairs

Be sure to customize a cover letter for each job you apply to, referring to the job description as a guide for what content to include.
Header & Salutation

Within your header, your contact information you list on your cover letter should be same as your resume. The date listed on your cover letter should be the date that you are submitting the cover letter. Make your best effort to include the hiring manager’s title if possible (e.g., Director of Human Resources). Always include the company’s physical address in the header of your cover letter. Refer to the reader/hiring manager by their full name if able, but if not, use "Dear Hiring Manager:"

Header Example

First and Last Name
Position Title
Company Name
0000 Peachtree Dunwoody Rd Atlanta, GA 30328

Greetings First and Last Name,
Opening & Introductory Paragraph

It is important that you craft an opening paragraph that will hook your reader’s attention. Your opening paragraph will set the stage for the rest of the cover letter. Include the “why” for your application and why you want this specific job at this company. You should open the letter with a statement of why you are writing. Opening tells what the job title you’re applying for is and where you found it. The introductory paragraph will contain 3-5 skills you possess that the company seeks in a new hire and shows attention to exact requirements.

Introductory Paragraph Example

“I am writing to express my interest in your computer technician posting located on your employment opportunities website. With my class project work on building a computer, hardwiring, and [SKILL 3] skills, I can serve as a contributing team member at [COMPANY] well.”
Body Paragraph Example

“During my time working at the IT Desk at Georgia Tech, I have been able to expand on my problem-solving, troubleshooting, and computer network skills. Assisting clients with troubleshooting technical problems and connection issues, I assist an average of 5 customers an hour. Most recently I received the employee of the month for my accomplishments. I understand that having knowledge of various, common technical issues is essential to success to this position and I am confident in my abilities to excel in this task and the position overall.”
Conclusion & Wrapping Up

You’ve successfully outlined your abilities as it relates to the role, yay! Now that you are here, it is important to end the letter on a positive note to reiterate the skills you have previously outlined in your letter. If there is something unique about the company you are applying to become a part of that you can relate to, really like, etc., add it! Once you feel you have touched on all that you can, thank the reader for their time and invite the reader to contact you.

Concluding Paragraph Example

“It would be an honor to join the _____ team to assist in adding value to the initiatives and goals that you have. I am self-assured I can positively contribute to the organization and contribute to enhancing the _____ experience for all. I have attached my resume for review. Please feel free to contact me via phone or email to discuss how my computer network project experience, application knowledge, and communication abilities can serve you at ________.”
Example Cover Letter Outline

**NOTE: THESE ARE SAMPLE COVER LETTERS. THEY INCLUDE POSSIBILITIES AND AREAS THAT WILL CHANGE BASED ON NEEDS. DO NOT USE OR COPY VERBATIM.**

FirstName LastName  
City, State Zip (optional) | Phone Number | Email | LinkedIn

Date

Name of Employer/Hiring Manager  
Title of Employer’s Position  
Name of Company/Organization  
Street Address  
City, State, Zip Code

Dear Mr./Ms. Last Name or Dear Hiring Managers with Name of Company,

1st Section: “Why Am I Writing?” Identify the position you are applying for or the career interest area you are inquiring about. Identify where/how you heard of the opening or organization. Research the company and discuss why you are interested in working for that organization. It is imperative to demonstrate you are writing this cover letter specifically for this company.

2nd Section: “Who Am I and Why Should You Hire Me?” Identify your skills, experiences, and qualities that relate to the position (or interest area.) Highlight one or two of your strongest qualifications and explain how they relate to the needs of the employer. Do not simply state the facts that are on your résumé. (“Through my public relations internship at WWOW, I have developed sales and communication skills that are essential to the position of X,” sounds more informative than, “I have worked in public relations as an intern.”) Explain why you are specifically interested in the employer and the type of work or location, etc.

3rd Section: “My Next Step.” Refer the reader to the enclosed application, résumé, vitae, and/or status of other required documents. Close the letter with a strong interest in pursuing the next step of an employment interview, informational interview, and/or additional information or application. Thank the employer for their time and let them know you hope to hear from them soon. Clearly indicate whether you or the employer will follow up and what the next step will be.

Sincerely,

Sara Heartland, Recruiter
Universal Equity Partners
S.heartlan@Uni.com

Dear Mx. Heartland,

The position description listed on the Georgia Tech CareerBuzz site for your 2022 Private Equity Analyst Program caught my immediate attention. As a rising fourth year graduating May 2022, with a bachelor of science in economics I am seeking a full-time opportunity to enhance and practice equity deal-making and portfolio management skills in an immersive program. Here at Georgia Tech I have been active in the Foundation Investment initiative, as well as having experienced an internship with MT Associates. My portfolio modeling, forecasting and strong communications skills make me a strong candidate for the Universal program.

While interning with MT Associates I had the opportunity to shadow consultants as they called on major clients, then participating in modeling portfolios based on client growth specifications. As an economics major my analytical and software skills are targeted to understandings of the financial and investment markets. This fall term I will begin a senior project to explore emerging markets specifically related to green and climate issues, a growing concern worldwide.

Attached is my resume for your review. It demonstrates my academic achievements and engagement in various student investment initiatives on campus. Throughout my years at Georgia Tech I have successfully participated in group projects in leadership and support roles, as well as executing individual projects, all with strong problem-solving and analytical skills. Presentations and teaching/tutoring experiences have strengthened my communication abilities.

I look forward to speaking with you or an associate regarding the 2022 Private Equity Analyst Program of Universal Equity Partners. From the description it sounds as if it is the professional step I seek upon graduation from Georgia Tech and my skills will contribute to the growth of Universal Equity Partners. I can be contacted at 444.888.9999 or geo.burdell@gatech.edu and look forward to the opportunity.

Sincerely,

George Burdell

Human Resources
Honeywell
7901 Innovation Way
Mason, Ohio 45040

RE: JOB ID: req283476
Category: Engineering

Dear Human Resources staff member:

The co-op posting for Honeywell’s Intelligrated Product Development attracted my attention on CareerBuzz, and my current resume is attached for consideration for Job ID: req283476. Through several opportunities at Georgia Tech I have worked on cross-functional teams and relish learning from other disciplines in the process of product design and development. Data analysis is a recent area of focus where my skills would support the team effort. CAD and Microsoft Office are additional strengths.

As a member of an industrial design multidisciplinary class project I collaborated with students from four majors to create a 3-D printed prototype for an innovative solution in disabilities services to the legally blind. We designed and developed a speech recognition transcription process for taking notes in Braille.

In a recent data analytics courses my team created a user-friendly dashboard to complement logistics data collection to more efficiently redirect scarce equipment resources. I was a key player in collecting and analyzing the initial data.

Since a high school class in industrial design I have been a CAD user, creating and interpreting 3-D designs and projects ranging from study cubbies to machining replacement parts for tools. As a rising junior I anticipate graduation from the Georgia Institute of Technology in Spring 2023 with a bachelor of science in mechanical engineering with a product design concentration.

I can be reached at 678.888.4444 or l.marshall23@gatech.edu and look forward to speaking with you about the product development co-op at your Mason location.

Sincerely,

Grace Marshall
GINGER JONES

5/25/2021

Asia Lawson  
Director  
Name of Company/Organization Street Address  
City, State, Zip Code

Dear Asia Lawson,

I am excited to apply for the role of Associate Scientist. I will be obtaining a Master of Science in Biology from the Georgia Institute of Technology this Spring and believe that Lab Novu would be a wonderful company to begin my full-time career. My strong experimental background, and excellent communication skills make me a highly qualified candidate for this position.

As a previous intern at Pinnacle Pharma, I assisted with developing synthetic sequences, assessing and advancing novel proteins, and recording enzymatic performances. Currently, as a research assistant at the Collins lab at Georgia Tech, I am gaining more protein and gene editing experience, which I noted was a key component you are seeking in an ideal candidate. Although I pride myself on my technical skills, I recognize the importance of conveying the value of my work to others. My strong written communication skills helped me to contribute to two published scientific papers. I also have experience explaining my work to non-expert audiences as evidenced by my work as a Genetics Teaching Assistant and participation in the Three Minute Thesis competition. I believe this will help me succeed as a member of your cross-functional team.

Lab Novu is a pioneer in the protein therapeutic Biotech industry, and I would like to contribute to your important work. Please let me know if I can answer any questions or provide additional information. I’m looking forward to learning more details about the Associate Scientist position and the Lab Novu corporate family as a whole.

Sincerely,

Ginger Jones
Cover Letter Checklist

- Do you have the correct employer information listed?
- Is your letter error-free?
- Are you truly interested in the position you are applying for?
- Do you know why you are applying for the position?
- Have you identified your related experiences and skills and how they connect to the position?
- How can you contribute to the role, organization/company, etc.?
- Did you close out your cover letter appropriately?
- What are your next steps for follow-up if needed?
